2. POLICY: Environmental Policy

3. Introduction

The overall responsibility for environmental protection (EP) within WINNS is vested in me by virtue of our appointment as Director and thereby the principal responsible person under the EP Act 1995 and Environmental Act 2005. This Environmental Policy Statement, which is to be observed throughout WINNS Services, reflects the importance we attach to the protection of the environment.

WINNS will:

Meet all the requirements of Environmental Protection Legislation and the requirements of all EP policy, publications and instructions.

Adopt best practice in process operations and use the best available techniques not entailing excessive costs to minimise adverse effects on the environment.

Implement Environmental Management and Audit the System to identify and measure environmental effects and to manage compliance and achieve continual improvement in environmental performance.

I will exercise our environmental responsibilities through the organisation and by appropriate delegation to Managers. We further require this organisation to ensure that managers at every level make available adequate resources to discharge environmental responsibilities effectively. All line managers are to ensure that appropriate controls are in place to discharge their duties in this area of responsibility and that they and their staff have appropriate training. I have appointed the General Manager to provide advice to WINNS Services personnel in compliance with this policy.

I require every individual to take reasonable care to protect the environment from his or her acts or omissions and to report any matters of concern to the EP Manager for investigation.

Furthermore, I am committed to the effective use of resources and to the minimisation of waste and where practicable, to the re-cycling of waste products created by the Company's activities, and to environmentally responsible waste disposal. I am also committed to minimising energy consumption.

This statement is to be brought to the attention of all employees and prominently displayed on notice boards throughout the Company. The organisation and arrangements for environmental protection at WINNS are published in the Environmental Manual management system documentation, copies of which are to be readily accessible to all personnel.
